

Professional Overview

AI Product Leader with a proven record of delivering transformative AI and Generative AI products and solutions that drive measurable business outcomes. Expert in crafting strategic roadmaps, designing innovative operating models, and leading the development of large-scale AI/ML products. Recognized for empowering cross-functional teams and influencing senior stakeholders to deliver enterprise-scale AI solutions in highly regulated, fast-paced environments. Proficient in statistical modeling, advanced analytics, and building scalable AI architectures. Demonstrated success in driving data science initiatives, setting clear milestones, and ensuring timely, impactful results. Strong expertise in AI governance, strategic execution, and managing high-level stakeholder relationships to align business and technology goals.

Areas of Expertise

- AI & Generative AI
 - Responsible AI
 - AI Lifecycle Management
 - AI Governance
- Machine Learning
 - Natural Language Processing
 - Deep Learning
 - Econometrics
- Product Management
 - Stakeholder Management
 - Strategic Planning & Execution
 - Agile & Scrum Methodologies

Technical Skills: Programming: Python, R, SQL; AI/ML: Pandas, NumPy, Scikit-Learn, PyTorch; UI/UX: Streamlit, PowerBI; Cloud: AWS, Snowflake; MLOps: MLFlow, Airflow, GitLab.

Professional Experience

AI PRODUCT LEAD (AVP)
Nomura Holding America, New York, NY

2022 – Present

Driving impactful AI transformations and developing innovative AI strategies to bolster organizational growth and maintain a competitive edge.

- Led a cross-functional team of 15 members in the development and launch of AI/GenAI products, including an Anomaly Detection Engine, Intelligent Document Processor, AI Evaluation Application, and a Data Products Marketplace, achieving an increase in operational efficiency between 35% to 45%.
- Spearheaded the Anomaly Detection Product from ideation to launch, partnering with Operations and Regulatory Operations (RegOps) to reduce regulatory reporting errors for trade submissions. Achieved a 15% to 20% reduction in errors, contributing to enhanced compliance and reporting accuracy.
- Engineered a GenAI-powered legal document management solution for clause extraction, interpretation, Q&A, and comparison, winning the regional GenAI Hackathon finals organized in partnership with AWS. Reduced review time by approximately 120 hours per month, significantly enhancing project efficiency.
- Established and led the Products & Solutions Review Board and Weekly Platforms, Products & Solutions Forum, enhancing product delivery timelines by 25% to 30% and achieving 25% faster decision-making across departments.
- Led Product Lifecycle Management for all data and analytics products by establishing a tollgate review process, driving consistency across pre-PoC, post-PoC, pilot, and production stages. Reduced product failure rates by 20% to 25% through improved oversight and early intervention.
- Established AI Risk Assessment frameworks for PoC and production and played a key role in the development of the AI Evaluation Application by incorporating ethical guardrails for responsible AI. This initiative strengthened firmwide AI governance, leading to a 30% to 35% improvement in risk mitigation and a 25% reduction in bias incidents, while securing approvals for strategic AI initiatives firm wide.
- Directed the full lifecycle of vendor evaluations (DataRobot, Dataiku, ModelOp), from cross-functional assessments to onboarding, aligning solutions with governance and strategic goals. Developed comprehensive AI/GenAI strategies with build vs. buy analyses, accelerating vendor integration timelines by 20%-25%, enhancing innovation pipeline efficiency by 25%, and achieving 10%-15% in operational savings.

DATA SCIENCE MANAGER – GROUP DATA & ANALYTICS
Aditya Birla Group, Bengaluru, India

2019 – 2021

Led transformative AI/ML initiatives that achieved a 400% RoCE on a \$1.3B portfolio, improved forecasting accuracy by 25%, and generated over \$2M in business value, driving efficiency and revenue growth across sectors like trading, insurance, manufacturing, and energy.

- ◆ Led the development and implementation of advanced machine learning models to enhance demand forecasting across diverse fiber categories for a pulp and fiber business, achieving a 25% increase in forecast accuracy. Delivered over \$2M in value within 6 to 8 months and reduced logistics and changeover costs by leading a sales and operations planning initiative.
- ◆ Integrated a Humble-AI approach to introduce an end-to-end trading solution using predictive AI and optimization methods. Achieved over 400% annualized RoCE on a \$1.3B trading portfolio by generating advanced commodity price forecasts for a bulk commodity trading solution provider. This also enabled the creation of a new revenue stream in derivatives trading, specifically through Freight papers.
- ◆ Increased revenue growth by ~15% for health insurance clients by leveraging clustering techniques to generate customer digital personas, optimizing acquisition, cross-selling, and retention strategies through targeted messaging and personalized promotions.
- ◆ Drove the development of a Twitter sentiment analysis tool using NLP algorithms, contributing to more accurate Brent price predictions.
- ◆ Improved steam boiler efficiency at a coal-fired power plant through the creation of a machine-learning tool, enhancing operational performance and sustainability.

DATA SCIENTIST – GLOBAL ANALYTICS CENTRE **Cummins, Inc., Pune, India**

2018 – 2019

Leveraged advanced data analytics technologies to drive transformative business decisions across HR, sales, and engineering services divisions of the organization.

- ◆ Implemented a machine-learning model to forecast employee attrition, driving gap analysis, identifying key retention factors, and shaping data-driven policy enhancements, resulting in a 15% to 20% improvement in employee retention.
- ◆ Streamlined inconsistencies in product offerings and pricing across various channels and configurations, unlocking ~15% growth opportunities in Aftermarket Sales through enhanced pricing strategies and inventory alignment.
- ◆ Orchestrated the end-to-end development of analytical tools for the Engineering Services team, enhancing 'Right First Time' parts releases, identifying gaps, and optimizing reuse of parts across regions, resulting in a 15% to 20% boost in efficiency and resource allocation.

SOFTWARE ENGINEER **Tech Mahindra, Chandigarh, India**

2014 – 2016

Collaborated with product managers and software architects to design and develop innovative software solutions using cutting-edge technologies, enhancing efficiency and functionality across critical applications.

- ◆ Delivered robust technical support for eService, Vscan, and Siebel applications, maximizing operational efficiency for the General Electric Infrastructure Project, contributing to a 20% to 25% improvement in system uptime and performance.
- ◆ Designed and developed the SmartLoad web application, streamlining the management of Agora connections and mappings, which resulted in a ~30% reduction in manual processing time and improved data accuracy across workflows.

Education

Master of Information Systems Management (BIDA), with distinction
Carnegie Mellon University, Pittsburgh, PA. 2021 – 2022

Master of Business Administration
Symbiosis Centre for Information Technology, Pune, India. 2016 – 2018

Bachelor of Engineering in Computer Science & Engineering
Jorhat Engineering College, Jorhat, India. 2010 – 2014

Awards & Certifications

- ◆ Co-lead for the NY chapter of Women in Data, driving regional programming, speaker curation, and volunteer mobilization to elevate women in AI and Data Leadership, 2023-present.
- ◆ US Regionals Hackathon winner for a GenAI Launch event organized by Nomura in partnership with Amazon AWS for developing a GenAI-powered Legal Agreement Management application, 2024.
- ◆ Most Valuable Player Award recipient at Nomura for Q4 2023.
- ◆ Gold Medalist in Bachelor of Engineering in Computer Science and Engineering, 2014.
